### **DETAILED ACTION**

1. This communication is in response to applicant's response received on June 16, 2006.
2. Claims 1-2, 4-9, 12-16, 18-23 and 26-28 are cancelled.

### ***Allowable Subject Matter***

1. Claims 3, 10, 11, 17, 24, 25 and 29 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The primary reasons for the allowance of the independent claims 3, 10, 17, 24 and 29 are the inclusion of the following limitations that are not found in the prior art and they are uniquely distinct features. The closest prior art is Reitmeier et al (2002/0003881 A1). Reitmeier discloses a method and apparatus for securing and, optionally, distributing an information stream by dividing the information stream into a collection of segments and compressing the segments, rearranging the order of the segments and encrypting the segments prior to distributing the encrypted segments to one or more users within an information distribution system.

However, this art fails to anticipate or render the following limitations:

"Claim 3: wherein the information communication terminal that transmits the information comprises:

Art Unit: 2132

a naming rule setting unit which sets a naming rule that sets separate names to the elements instead of their original names;

a separate-name setting unit which sets separate names to the elements of the information instead of their original names, based on the naming rule set by the naming rule setting unit; and

a naming rule transmitting unit which transmits the naming rule set by the naming rule setting unit, and

wherein the information communication terminal that receives the information comprises:

a naming rule receiving unit which receives the naming rule; and

a name changing unit which changes the separate names of the elements of the information to their original names, based on the naming rule received by the naming rule receiving unit.”

“Claim 10: a naming rule setting unit which sets a naming rule that sets separate names to the elements instead of their original names;

a separate-name setting unit which sets separate names to the elements of the information instead of their original names, based on the naming rule set by the naming rule setting unit; and

a naming rule transmitting unit which transmits the naming rule set by the naming rule setting unit.”

“Claim 17: wherein the steps executed by the information communication terminal that transmits the information comprises:

setting a naming rule that sets separate names to the elements instead of their original names;

setting separate names to the elements of the information instead of their original names, based on the naming rule set; and

transmitting the set naming rule to the information communication terminal that receives the information, and

wherein the steps executed by the information communication terminal that receives the information, further comprises:

receiving the naming rule; and

changing the separate names of the elements of the information to their original names, based on the received naming rule.”

“Claims 24 and 29: setting a naming rule that sets separate names to the elements instead of their original names;

setting separate names to the elements of the information instead of their original names, based on the set naming rule set; and

transmitting the set naming rule to the information communication terminal that receives the information.”

Art Unit: 2132

3. The dependent claims 11 and 25 are allowed because they were originally found to include a unique feature not found in the closest abovementioned art.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Abdulhakim Nobahar whose telephone number is 571-272-3808. The examiner can normally be reached on M-T 8-6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gilberto Barron can be reached on 571-272-3799. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
